THE AMERICAN INVENTORS PROTECTION ACT OF 1999

Mr. HATCH. Mr. President, I am pleased to rise today, along with the

Ranking Member on the Judiciary Committee, Senator LEAHY, to introduce the American Inventors Protection Act of 1999. Simply put, this legislation reflects several years of discussions and consensus-building efforts in the Senate and the House, and represents the most important and most comprehensive reforms to our nation's patent system in nearly half a century. As we prepare to enter a new millennium built on high-tech growth, the Internet, and electronic commerce, in which American competitiveness will depend on the strength of the patent system and the protections it affords, this legislation could not be more timely.

The last time the Patent Act underwent a significant update was in 1952. Since then, our Nation has experienced an unprecedented explosion of technology growth and a tremendous expansion of the global market for the fruits of American ingenuity. Yet our patent laws have remained largely unchanged in the face of the new demands engendered by these developments. This legislation—which many of my colleagues will recognize as a compromise version of the Omnibus Patent Act passed by the Judiciary Committee with near unanimity more than 2 years ago—will effect targeted changes to the patent code to equip the patent system to meet the challenges of new technology and new markets as we approach the new millennium, while at the same time promoting American competitiveness and ensuring adequate protection for American innovators, both at home and abroad.

As many of my colleagues know, this legislation is the product of several years of discussion and extensive efforts to reach agreement on a responsible package of patent reforms. The Senate made significant progress toward consensus during the last Congress when several key compromises were reached in the Judiciary Committee to strengthen the bill's protections for small businesses and independent inventors and to preserve America's competitive edge in the face of increasing global competition. I was pleased this year to see those efforts continued in the House, where the supporters and former opponents of the bill agreed to sit down and work through their differences to produce a constructive patent reform bill. The result is H.R. 1907, which has 59 cosponsors in the House—including the most ardent opponents of prior reform measures—and was passed in the House by a 376-43 vote.

In many ways, the House-passed "American Inventors Protection Act" builds upon the compromises reached in the Senate during the last Congress. For example, the widespread agreement on 18-month publication of patent applications is centered around the
